RESPONSE TO OFFICE ACTION

In response to the restriction requirement of September 12, 2002, the Applicant provisionally elects claims 1-23, drawn to a method for monitoring for a user the price activities of a financial instrument traded in a financial market.

Applicant respectfully traverses the restriction requirement. The criteria for restriction between patentably distinct inventions is proper only if: 1) the claimed inventions are either "independent" or "distinct" from each other under for example §806.05(e) AND 2) there is a serious burden on the examiner unless a restriction is made. MPEP §803. Applicant traverses the restriction requirement on least the basis that the Examiner has not met the showing of a serious burden. Examiner has not for example cited patents to support the statement
